microscopy

AnMo Electronics Corp., Taiwan introduces...

### Unique Handheld Digital Microscope for on-site Inspections & Measurements

#### Applications:

- ▶ Metals
- ▶ Weldings
- ▶ Corrosion
- ▶ Electricals & Electronics
- ▶ Printing & Paints
- ▶ ENT, Hair, Skin & Dental
- ▶ Jewelry
- ▶ Minerals
- ▶ Chemicals
- ▶ Textile Machineries
- ▶ Pharmaceuticals
- ▶ Archeology
- ▶ Forensic
- ▶ Petrochemicals
- ▶ On-site inspections
- ▶ Education
- ▶ Research & Development
- ▶ And many others....

#### High Quality & User-friendly... LIKE NEVER BEFORE ....for Inspection, QC & Education

In general, Microscopes are considered as Laboratory instrument for magnification of small sized samples, after precise sample preparation. It again needs optional items like – Camera, Image Analysis Software etc. which makes it a larger investment. Still has limitation that it cannot be used on-site to test big size samples.

AnMo Electronics has succeeded in addressing this limitation by developing handheld type Digital Microscope. The portability of this microscope can let you explore all those areas which are inaccessible with other bulky microscope. With this microscope, you can easily see magnified images, up to 500 times, instantly onto your computer or projected onto large screen. The images can be stored, printed & mailed. It offers features of performing various types of measurements as well.

One of the main advantages is, while inspecting big size samples, there is no need to cut the sample and be taken to the Laboratory. The sample can be inspected on-site without any preparation.

Imagine explaining a complex object to an audience, but instead of using boring lifeless pictures or unconvincing videos, show it live directly to your audience and interact with their curiosities with our Dino-Lite handheld Digital Microscope. This is just one small example of the many ways our products redefine the microscope.

It's easy & high quality performance is proved by having installed over 350 units in India which includes, L&T, Tata, Honda, Anchor, GE, Dabur, Tetrapack, Gabriel, Indian Institute of Science, IISER and many more.

#### PERFOMAX ANALYTICAL

(Authorized Distributor of Kontrelek Instruments for Dino-Lite Microscopes)

704, Crystal Paradise, Veera Desai Road, Andheri (W), Mumbai - 400 053.

Tel: (022) 26731868 Fax: (022) 26731869 Cell: (0) 9819881999

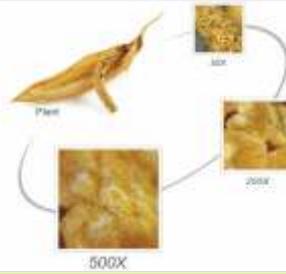

Email: sales@perfomaxtech.com Web: www.perfomaxtech.com

**Wide range of models for optimum performance for every kind of samples:**

Magnifications

- 5x ~ 40x
- 20x ~ 90x
- 20x ~ 200x
- 400x ~ 470x
- 500x & 800x

Resolution

- VGA
- 1.3 MP
- 5MP

**Features of Dino-lite Digital Microscopes:**

Unique Handheld and Portable Design helps in inspecting the samples On-Site or on the shop floor

Image capturing & Live Video with just one click. The images and videos can then be Printed, Saved or transferred by Email

Polarization feature to reduce glare from Reflecting Surfaces

Long working distance models for Large samples as well as Short working distance models for smaller samples

High intensity LEDs (8 nos) for better clarity

Since it is powered by USB, no external connection required and can be easily connected to the PC

User friendly and freely downloadable Windows and Apple compatible SOFTWARE

Easy & Useful Measurement function, it can measure the radius, diameter, circumference, area etc. on the image

**Wide range of stands to suit different type of samples:**

**Variety of Caps specially designed to use with different applications:**
